PROBLEM STATEMENT

A qualified, passionate educator seeking growth, impact, and stability

Fragmented hiring with scattered, informal opportunities.

THE TEACHER

No structured path to showcase impact or credibility.

Talented teachers remain unseen and underutilised not due to lack of capability, but due to lack of structured access and recognition

Institutions searching for qualified teachers aligned with their values

Hiring is reactive and unreliable, dependent on referrals

THE SCHOOL

Resumes and interviews fail to signal true commitment

Institutions face high attrition and disrupted continuity not from lack of intent, but from lack of access to trusted, aligned talent.

30:1 Prescribed Pupil-Teacher Ratio (PTR) at primary level

23%

Schools fail to meet required teacher strength

VERIFIED TALENT

DEMAND VALIDATION

Primary research validates a two-sided market need: education hubs struggle to find the right teachers, while educators seek better recognition, development, and career opportunities

100+ EDUCATORS REACHED

45+ EDUCATION HUBS REACHED

CHALLENGES IN TEACHER SPECIFIC PLATFORMS

No Skill Validation

Existing platforms rely only on resumes with no real evaluation of teaching ability

Transactional Job Marketplace Model

Relationship ends after hiring; no long-term teacher growth or tracking

Weak Hiring Infrastructure for Schools

Only job posting tools; shortlisting and evaluation remain manual and unstructured

No Trust & Credibility Framework

Limited verification of credentials or teaching performance history

CHALLENGES IN GENERAL HIRING PLATFORMS

Not Education-Specific

General platforms treat teachers like generic job seekers, mixing them with corporate roles. They lack curriculum filters, grade segmentation, and subject-specific matching.

No Teaching Demonstration Capability

Hiring is resume-based with no system to evaluate real classroom ability. There is no structured way to assess teaching style, pedagogy, or live performance.

No Teacher-Centric Career Ecosystem

Platforms focus on corporate growth, not teacher development. There is no mentorship, pedagogy support, or structured professional growth pathway.
